

FZ CBUE TECH

# Ethical Hacking Full Course

Basic to Advance Level Ultimate Roadmap. Apni security aur hacking labs aaj se hi design karein.

⚡ ALL REQUISITE PHASES COVERED STEP-BY-STEP ⚡

# Course Roadmap Structure

## Phase 1: Lab Setup

Hacking environments aur operating systems ko safe tarike se configure karna seekhein gy taake main machine secure rahe.

## Phase 2: OSINT

Hidden metadata extraction, footprinting, aur digital footprints analysis ki modern legal techniques master karein.

## Phase 3: Live Attacks

Real networks ko scan karna, practical phishing methodologies samajhna, aur device hardening implement karna.

# Phase 1: Lab Setup & Foundation

## Oracle Virtual Box Setup

Apni machine par secure virtual sandboxed machines deploy karna seekhein.

## Kali Linux Installation

Hacking tools se pre-loaded penetration testing OS ko clean setup karna.

## Basic Terminal Commands

Terminal navigation aur systems control hasil karne ke basics commands.

600 × 400

# Phase 2: Metadata & OSINT

## What is Meta Data?

File metadata aur iske pichay chhupi sensitive info ko analyze karna.

## Extract & Remove Meta Data

Files aur media ki data details nikalna aur unhein clean karna seekhein.

## Advance OSINT Tools

Open Source Intelligence use karte hue public target info collect karna.

600 × 400

# Phase 3: Active Scanning & Attacks

## Nmap Port Scanning

Target active hosts mapping aur ports check karne ka power tool.

## Phishing Attacks & Tools

Practical understanding of phishing pages, delivery methods and templates.

## Live Phone Hacking Demo

Practical visualization ke systems aur smartphones actual attack kese hote hain.

600 × 400
